OneFit LID

Logma's Integration Dashboard

Logma's Integration Dashboard is an intelligent integrated information tool providing targeted personnel with the correlated data required without the need to produce reports from multiple and diverse sources.

Different LIDs can be introduced for each department (or role) within your organisation to ensure that the relevant information is presented to your staff.

Benefits

- Consolidate financial data
- Gain business insight
- Share master data
- Respond proactively to business events
- Visual presentation of performance measures
- Ability to identify and correct negative trends
- Measure efficiencies and/or inefficiencies
- Ability to generate detailed reports showing new trends
- Ability to make more informed decisions based on collected business intelligence
- Align strategies and organisational goals
- Save time, removing the necessity to run multiple reports
- Gain total visibility of all systems instantly

Examples of Uses

Sales Team – single presentation of customer, product, performance, CRM, complaints or other relevant data drawn from defined integrated and non-integrated data sources.

Senior and Middle Management – single presentation of sales individuals or team performance with details of customer, product, performance, CRM, complaints or other relevant data drawn from defined integrated and non-integrated sources.

Financial Control – consolidated presentation of accounts and financial information drawn from departmental, company, multi-company and multi-location as required. Can include third party data when permitted.
